Week 2 Quiz

LATEST SUBMISSION GRADE 100% 1. What is a windowed dataset? 1/1 point A fixed-size subset of a time series There's no such thing The time series aligned to a fixed shape A consistent set of subsets of a time series ✓ Correct 2. What does 'drop_remainder=true' do? It ensures that all rows in the data window are the same length by adding data O It ensures that the data is all the same shape It ensures that all rows in the data window are the same length by cropping data O It ensures that all data is used / Correct 3. What's the correct line of code to split an n column window into n-1 columns for features and 1 column for a label 1/1 point dataset = dataset.map(lambda window: (window[n-1], window[1])) dataset = dataset.map(lambda window: (window[:-1], window[-1:])) dataset = dataset.map(lambda window: (window[-1:], window[:-1]))

dataset = dataset.map(lambda window: (window[n], window[1]))

x_train = series[:split_time]

	time_valid = time[split_time:]	
	x_valid = series[split_time:]	
(time_train = time[split_time]	
	x_train = series[split_time] time_valid = time[split_time]	
	x_valid = series[split_time]	
(time_train = time[:split_time]	
	x_train = series[:split_time]	
	time_valid = time[split_time]	
	x_valid = series[split_time]	
	✓ Correct	
. 1	f you want to inspect the learned parameters in a layer after training, what's a good technique to use?	1 / 1 point
(Assign a variable to the layer and add it to the model using that variable. Inspect its properties after training 	
(Run the model with unit data and inspect the output for that layer	
(Iterate through the layers dataset of the model to find the layer you want	
(Decompile the model and inspect the parameter set for that layer	
	✓ Correct	
ı	How do you set the learning rate of the SGD optimizer?	1/1 point
(Use the Rate property	
(You can't set it	
(Use the Ir property	

	○ Use the RateOfLearning property	
	✓ Correct	
9.	If you want to amend the learning rate of the optimizer on the fly, after each epoch, what do you do?	1/1 point
	Use a LearningRateScheduler and pass it as a parameter to a callback	
	Callback to a custom function and change the SGD property	
	Use a LearningRateScheduler object in the callbacks namespace and assign that to the callback	
	○ You can't set it	
	✓ Correct
