LA	Veek 4 Quiz TEST SUBMISSION GRADE 00%	
1.	The diagram for traditional programming had Rules and Data In, but what came out?	1/1 point
	Answers	
	Binary	
	Machine Learning	
	Bugs	
	✓ Correct	
2.	Why does the DNN for Fashion MNIST have 10 output neurons?	1/1 point
	○ To make it train 10x faster	
	O To make it classify 10x faster	
	O Purely Arbitrary	
	The dataset has 10 classes	
	✓ Correct	
3.	What is a Convolution?	1/1 point
	A technique to make images smaller	
	A technique to make images larger	
	A technique to extract features from an image	
	A technique to remove unwanted images	
	✓ Correct	
4.	Applying Convolutions on top of a DNN will have what impact on training?	1 / 1 point
	It will be slower	
	It will be faster	
	There will be no impact	
	lt depends on many factors. It might make your training faster or slower, and a poorly designed Convolutional layer may even be less efficient than a plain DNN!	

onormalize flatten	
rezize()	
rescale	
✓ Correct	
6. When using Image Augmentation with the ImageDataGenerator, what happens to your raw image data on-disk.	
A copy will be made, and the copies are augmented	
A copy will be made, and the originals will be augmented	
Nothing	
The images will be edited on disk, so be sure to have a backup	
✓ Correct	
7. Can you use Image augmentation with Transfer Learning?	
No - because the layers are frozen so they can't be augmented	
Yes. It's pre-trained layers that are frozen. So you can augment your images as you train the bottom layers of the	
DNN with them	
✓ Correct	
0. When training for multiple places what is the Class Made for Image Augmentation?	
8. When training for multiple classes what is the Class Mode for Image Augmentation? 1/1 point	
Class_mode='multiple'	
class_mode='non_binary'	
class_mode='categorical'	
Class_mode='all'	
✓ Correct
